# The Market Opportunity

What drives Real Estate value?

- Calgary Housing Market
- Supportive Policies
- Untapped Potential

# What is Real Deals?

# The Customer and the Problem

**The Target Customer**

Inner-city Calgary homeowners who own aging, low-density properties with significant untapped land equity.

**The Structural Mismatch**

A gap exists between rising inner-city land values and the ability of individual landowners to develop high-density housing.

**The Binary Choice Trap**

Owners currently must choose between keeping an underutilized asset or selling outright and forfeiting future redevelopment "lift".

**The Coordination Gap**

The market lacks a trusted intermediary to align these two parties into mutually beneficial Joint Ventures (JV).

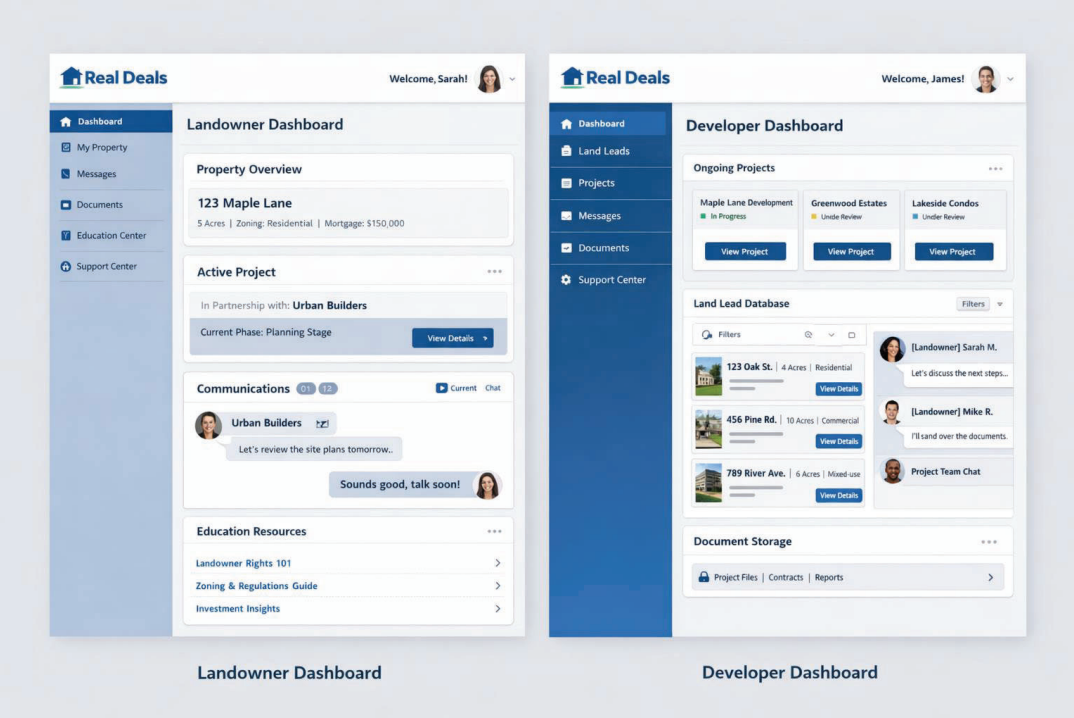

# The Solution

**A Two-Sided Platform:** Real Deals connects landowners with vetted developers to facilitate high-value redevelopment partnerships.

**Education First:** The platform provides feasibility modelling and zoning education to bridge information gaps.

**Vetted Ecosystem:** Every developer passes credit and portfolio screenings to eliminate the "trust deficit" for homeowners.

**Project Management Hub:** A centralized dashboard for communication, documentation, and project transparency throughout the build.

Landowner Dashboard

Developer Dashboard

# Competitive Positioning

**Fragmented Landscape:** Traditional brokers and informal, unvetted off-market networks

**Unbiased Incentive:** Success is tied to long-term project value – converts landowners to equity partners

**Two-sided network effect:** More landowners + developers = stronger marketplace

**Education Gap:** Removes adoption barriers for landowners

**Trust and Knowledge:** Vetting + structured process builds credibility

**Off-Market Opportunities:** Deal flow and database for developers

| Home Owner Economics | |
|---|---|
| Home Price | $1,000,000 |
| Mortgage | $500,000 |
| Home Owner Equity | $500,000 |

| Developer Economics | | |
|---|---|---|
| Number of Units | 4 | |
| Unit Size Sqft | 1,500 | |
| Construction Cost Sqft | $400 | * Includes developer fee |
| Total Construction Cost | $2,400,000 | |

| Construction Loan Terms | |
|---|---|
| LTC | 75.00% |
| Total Loan Size | $1,800,000 |
| Interest Rate | 6.50% |
| Construction Period Yrs | 1 |
| Annual Interest | $117,000 |

Page 1

| Deal Economics | | Equity Based Structure |
|---|---|---|
| Equity Required | $600,000 | *Equity %* |
| Home Owner Equity | $500,000 | 83% |
| Developer Equity | $100,000 | 17% |

| Sale Economics | | |
|---|---|---|
| Unit Price | $800,000 | |
| Total Sale | $3,200,000 | |
| Construction Loan | $1,800,000 | |
| Interest Cost | $117,000 | |
| Closing Costs | 3.00% | 96,000 |
| Platform Fee | 2.00% | 64,000 |
| Net Cash Flow | $1,123,000 | |

| Partnership Free Cashflow | |
|---|---|
| Home Owner | $935,833 |
| Developer | $187,167 |

# Business Model

**Success-Based Revenue:**
2% transaction fee at project completion and final sale

**Zero Upfront Risk:** No listing fees = risk-averse landowners' adoption

**Value-Driven Capture:** Revenue tied to the *total* finished project value

**Scalable Future Streams:** Developer subscription fee and targeted advertising

# Summary of Financial Projections

# Go-to-Market Strategy

1

## City-by-City

Deep liquidity in Calgary first, then expand market by market

2

## Education First

Short-form video & density visuals build trust before the pitch

**FLYWHEEL**
EFFECT

3

## Targeted Outreach

MLS & CREB networks, direct mail to inner-city neighbourhoods

4

## Pro Partnerships

Lawyers & lenders integrated to build ecosystem credibility

*More landowners + more developers = more deals. The flywheel builds itself.*

# Funding Request, Milestones, and Costs

**Funding Request:** Seeking $297,025 in startup capital to fund the initial cash burn through the pre-revenue phase.

**Core Startup Costs:** Major investments include technology infrastructure ($5,500/mo), marketing, and cyber security.

**Milestone 1:** Platform launch and onboarding of the first cohort of 10+ vetted developers.

**Milestone 2:** Achieving the first 50 matched redevelopment partnerships in the Calgary market.

**Milestone 3:** Reaching EBITDA positive operations by the 25-month mark.

# Exit Strategy

**Strategic Acquisition:** High potential for acquisition by major PropTech players (e.g., CoStar, Opendoor) seeking a foothold in Canada.

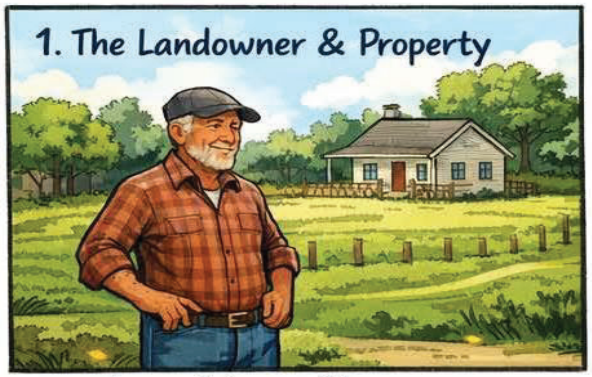

**Financial Sale:** Attractive to REITs or large-scale institutional developers looking for a proprietary deal-flow engine.

**Secondary Market Data:** The platform's proprietary data on feasibility and bidding behavior creates a high-margin asset for urban planners.

**Standardization Potential:** The "Real Deal" framework is repeatable and could be licensed globally as a modular solution for urban densification.

# REAL DEALS

## Partnering for Profits

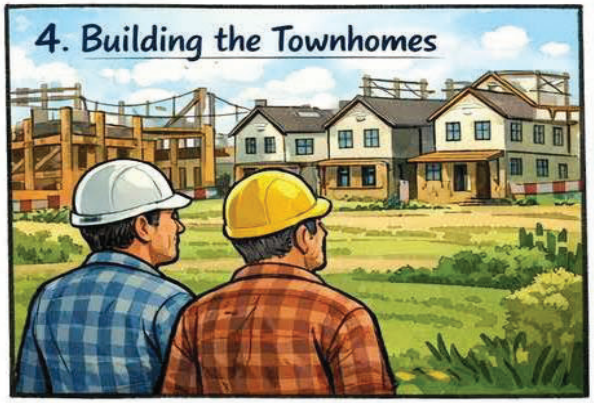

Large lot, small house.
